**Memorandum of Understanding (LIGO-M000128-00-M)**  
**between the**  
**Elementary Particles and Relativity Group**  
**Department of Physics, California State University Dominguez Hills**  
**and the**  
**Laser Interferometer Gravitational-Wave Observatory (LIGO) Laboratory**  
**April 15, 2000**

This Attachment A to the Memorandum of Understanding LIGO-M000128-00-M covers the role of the Elementary Particles and Relativity Group, Department of Physics, California State University Dominguez Hills (EPRG-CSUDH) as a Charter Member of the LIGO Scientific Collaboration (LSC) and a member of the LIGO I Development Group (L1DG). The period of performance for the activities in this Attachment is from April 15, 2000 to August 15, 2000. This period may be modified by agreement to a revision of this Attachment.

1. LIGO Scientific Collaboration - The LIGO Scientific Collaboration (Collaboration) is organized as a separate organization from the LIGO Laboratory. It includes scientists from the LIGO Laboratory, and those from collaborating institutions, and has its own leadership and governance. The Collaboration will ensure equal scientific opportunity for individual participants and institutions. It will organize the research, publications, and all other scientific activities. The Collaboration will report to the Laboratory Directorate for final approval of its research program, technical work, observational physics publications, and talks announcing new observations and physics results. This will be done through regular semi-annual reports to the Directorate and its PAC.
2. Charter Membership - An initial period for formation of the Charter group of institutions in the LIGO Scientific Collaboration commenced on March 1, 1997 and ended following the first full meeting of the Collaboration at which the Collaboration Council assumed its role.

Following the charter period, proposals will be evaluated and approved, as appropriate, through the Collaboration Council. An MOU with the LIGO Laboratory, including Attachments defining specific work, will be required for any participating institutions.

3. This document is an agreement between the Elementary Particles and Relativity Group, Department of Physics, California State University Dominguez Hills (EPRG-CSUDH) and the LIGO Laboratory concerning the activities of the EPRG-CSUDH as a Collaborating Institution in the LIGO Scientific Collaboration (LSC) and in the LIGO I Development Group (L1DG), and as indicated in Items No. 8 and No. 9 below.

4. LIGO I Development Group - The LIGO I Development Group is the scientific collaboration for implementing and exploiting the initial LIGO detector and physics through the initial science data run. Only groups who establish a specific Attachment approved by the LIGO Laboratory, which defines a sufficient contribution and participation in LIGO I development, implementation or data analysis will be part of this initial LIGO data run and science. Participation in future data runs and science that follow LIGO I will be possible for other groups, with guidelines to be determined by the LIGO Scientific Collaboration. It is anticipated that LIGO I data will only be made available through formal collaboration within the LIGO I Development Group during the first two years following its collection.

The general guideline for institutional membership in the LIGO I Development Group is that the contribution per collaborator of any new group to the design, construction, and implementation of the initial LIGO detector and to the first data run be comparable to that of the LIGO Laboratory scientists.

5. Report of Progress - The EPRG-CSUDH will provide a status report on its activities in support of LIGO every six months. The report will consist of: a) a summary status on research by topic as indicated Items No. 8 and No. 9 below including progress against the milestones if any, significant accomplishments such as new insights/discoveries or publications, issues of concern if any, and an indication of invested time, b) updated List of Collaborators, and c) a plan of activities for the succeeding six-monthly period. The report will be due one month before the close of the period of performance under the Attachment in question.
6. Term of Membership - The Membership will be renewed every six months upon evidence of satisfactory performance of agreed upon duties.

The coordinates of EPRG-CSUDH members are included in the Attachment Z to the Memorandum of Understanding LIGO-M000128-00-M.

7. Intellectual Property Rights - The rights to intellectual property developed under this Attachment will be subject to the National Science Foundation Grant Policy as indicated in Section 730, Intellectual Property.
8. LLAL Software Conventions - It is necessary that any delivered code conforms to the LLAL style as laid out in the LLAL specification T990030. This includes: 1) coding style, headers, etc.; 2) use of function calls, etc.; 3) organization of software in the directory structures indicated in the document; 4) inclusion of test codes and validation tests to enable users to verify successful installation of implementation; and 5) documentation and users manuals (html or pdf) to enable users to understand and adopt code.
9. The EPRG-CSUDH consists of Professors Kenneth Ganezer, George Jennings, William Keig and Sam Wiley, and possibly one to two graduate or undergraduate students. K. Ganezer is the primary party to this agreement.

During the period April 15, 2000 to August 15, 2000, the EPRG-CSUDH will focus primarily on issues related to the signal detection and backgrounds for stochastic and short burst gravi-

tational radiation, and the 40m LIGO prototype (40m) upgrade, as follows:

- a) K. Ganezer will undertake simulations that are relevant to the 40m upgrade, work on preparing the new hardware for the 40m upgrade, and on correlating Super-Kamiokande supernova and cosmological neutrino searches with gravitational wave studies at LIGO.
  - b) G. Jennings will work on simulations and hardware for the 40m upgrade, as described in paragraph a) above.
  - c) W. Keig will work on hardware and simulations for the 40m upgrade, and on correlating cosmological neutrino and gravitational wave sources, as described in paragraph a) above.
  - d) S. Wiley will work on simulations for the 40m upgrade, as described in paragraph a) above.
10. During the period April 15, 2000 to August 15, 2000, the LIGO Laboratory will provide, as requested and necessary, LIGO data of relevance to the research in item No. 9 above.
  11. The research effort pursuant to this Attachment A will be coordinated by Kenneth Ganezer, and Albert Lazzarini and Alan Weinstein on behalf of EPRG-CSUDH and the LIGO Laboratory, respectively.
  12. Resource Sharing: The LIGO Laboratory will contribute resources including allocation of appropriate scientific and engineering personnel, research facilities and funding in support of the effort in Item No. 9, as indicated below. These resources will be in addition to the coordination effort and data to be made available per Item No. 10 above.
    - a) Accommodations for EPRG-CSUDH investigators while on LIGO research assignment at Caltech, and /or LIGO sites.

Approved:

Barry Barish  
LIGO Laboratory Director
